### TECHNICAL SPECIFICATIONS

|                   |                                |
|-------------------|--------------------------------|
| Input Voltage     | 400V /2 Phase                  |
| Output Voltage    | 120V – 0 – 120V                |
| Capacity          | 25KVA                          |
| Frequency Range   | 40 - 60Hz                      |
| Cooling           | Natural Air                    |
| Insulation        | Class F                        |
| Insulation Level  | 2.5KV                          |
| Core Loss         | >600W                          |
| Copper Loss       | 900W                           |
| Temperature Rise  | 60°C                           |
| Efficiency        | 95%                            |
| Protection        | I/P MCB's                      |
| Indication        | I/P & O/P LED's                |
| Approx. Weight    | 250Kgs                         |
| Approx. Dimension | 500mmx400mmx650mm<br>L X W X H |

**RUGGED AND AESTHETIC MECHANICAL  
AND ELECTRICAL DESIGN**

**CUSTOM MADE EQUIPMENTS ARE ALSO AVAILABLE**
